

Jamb.

Role: Patination & Finishing Technician

Location: Mitcham

Hours: Monday to Friday, 8am – 4pm

About us:

Founded in 2001 by Will Fisher and Charlotte Freemantle, Jamb has built a reputation with the world's leading architects and designers for dealing in the finest antique and reproduction fireplaces, lighting, and furniture. We are a team of over 50 people working across two locations in London: our showroom and office on Pimlico Road, and our warehouse and workshop in Mitcham.

About this role:

We are looking for a **Patination & Finishing Technician** to join our lighting workshop in Mitcham. This is a hands-on technical role working with metal, finishes and specialist processes to produce high-end lighting for clients around the world. Our fixtures are all individually hand patinated and wired in our workshop, with each piece requiring a combination of technical skill, consistency and a keen eye for detail.

You will be responsible for completing lighting orders in line with the workshop schedule and quality standards, while contributing to a clean, organised and safe workshop. Jamb is also recognised for our innovative wiring solutions and award-winning compliance, which are an important part of the quality and functionality of each fixture.

About you:

We are looking for someone who takes genuine pride in making things well.

You will enjoy working with your hands and have an appreciation for materials, colour, texture and finish. You will be comfortable working carefully and consistently, following detailed specifications while also developing the judgement needed to achieve the right finish.

Experience of working with metal, patination, finishing, painting, polishing or similar hands-on processes would be valuable, but just as important are a willingness to learn, attention to detail and a strong sense of responsibility for the quality of your work.

If you are interested in joining our team please send your CV to info@jamb.co.uk
